Report on Wheelchair

For June, 2016

On June 30th, 2016, CMC national office has donated a wheelchair to an old man Mr. Nou Neang. He is 69 years old and lives with his family at Boeung Daunba village, Slakram commune, Siem Reap province, at the compound of Siem Reap City. Nou Neang has four children (two sons and two daughters), there is only one widow daughter is living with him and other three grandchildren, his widow daughter is a nurse and who is responsible to feed six member in family. From the time that he had high blood pressure and disability for nearly five years, he is only stay at home with his wife who is also has the medical conditions and another three grandchildren including an adopt child who is always closely to help him in bring food and drink to feed him (Please see the enclosed file of biography of this girl and Pasto in the email), for the rest of that he is on the bed all the time. Since he was diseases of high blood pressure he could not rotation or moving by himself without someone

helping to carry him around to bathroom all the time, this is because of his disability a state of paralysis of the arms and legs. Sometimes he was at home alone because all of his family member go out for their business, and some of his grandchildren are go to school, he was at home waiting them back from work, sitting in bed during the absent of his family they just put water and food store near by him if he needed until they back from work and school. It is hard for him to walk anywhere especially go to attend the ceremony around his village or Church or visit his neighbor he does not have chance for that, he stay at home and on the bed cannot even to the bathroom by himself.

Most of the time he is laying or playing on the bed with his adopting child and looking around to the field around his house, because he couldn't go anywhere, not even go to attend any event with his families and neighbor outside of his home. Mr. Neang and his family are very happy for getting this wheelchair, by having this wheelchair we are giving him the ability to go to outside and more around by someone or his adopting child push him to move around to see other people like some of his families and neighbors, he can even sit in the wheelchair in front of his house to play with his grandchildren and friends or go to attend some event including ceremony church in his village. This wheelchair also helps him to move around and easy go to bathroom, it make him easy. Instead of waiting for his families to come back from work to carry him to walk to outside his house and having people to come to see him, he is now able to move around on his own or by his grandchildren push wheelchair.

CMC, Mr. Nou Neang and his families want to thanks everyone in Japan who helps sending wheelchairs to help our people in Cambodia. We want to thanks especially to the Wheelchairs of Hope, you have given our people hope and you put a smile on their face, most importance of all you give them the ability to move around. Thank you very much from the bottom of our heart, we pray that you will continue to send more wheelchairs to help our people in Cambodia

May God bless you and your ministry in Japan
